ForHerWellbeing

Website Structure & Content Strategy

Website Strategy and User Onboarding Document

Primary Website Objective

Convert website visitors into booked **1,000 Discovery Calls** through a clear, science-backed and frictionless user journey.

ForHerWellbeing

August 2026

1 Executive Summary

This document outlines the website structure, content strategy, and user onboarding flow for ForHerWellbeing.

The current website requires an immediate overhaul to reduce lead leakage and improve conversion into booked discovery calls. The new platform should communicate the core positioning clearly:

Precision wellness combining biochemistry, gut science, nutrition, and yoga.

The website should establish Dr. Raga Deepthi Ediga's scientific credibility, communicate the problems ForHerWellbeing addresses, clearly present the available programs, and guide visitors toward one primary action:

Book a 1,000 Discovery Call

The experience should be especially optimized for mobile users arriving from Instagram, referrals, and professional networks.

2 Product Understanding

2.1 What It Does

ForHerWellbeing provides science-based holistic wellness through three core offerings:

- Yoga
- Diet Coaching
- Gut Metabolism Reset

2.2 Target Audience

The primary audience is Indian women experiencing concerns such as:

- PCOS
- Thyroid-related concerns
- Difficulty with weight management
- Gut and digestive issues
- Hormonal and metabolic concerns

The business can subsequently expand its positioning toward Indian women living abroad, particularly in the UK, USA, Germany, and the Gulf.

2.3 Core Problem Solved

ForHerWellbeing aims to move beyond generic diet plans and identify the underlying factors contributing to hormonal, metabolic, and gut-related concerns.

2.4 Why ForHerWellbeing

The website should communicate Dr. Raga Deepthi Ediga's qualifications and experience as major trust signals:

- PhD from Heidelberg University
- IIT Bombay association

- 11 years of experience in Germany
- Personal experience navigating an autoimmune condition
- Experience working with 150+ women

2.5 Potential Confusion Point

Pricing and program dates must remain current and consistent across the website. Outdated batch information can create hesitation and lead leakage.

3 Website Goal

3.1 Primary Goal

The primary goal of the website is to convert qualified visitors into booked **1,000 Discovery Calls**.

3.2 First 5–10 Seconds

Within the first few seconds, visitors should understand that ForHerWellbeing is:

- Science-backed
- Focused on women's health
- Root-cause oriented
- Led by a qualified scientist
- Different from a generic lifestyle or diet brand

3.3 Primary Call-to-Action

The most important action across the website is:

Book Discovery Call

3.4 Post-CTA Experience

After clicking the CTA, users should be seamlessly routed to a timezone-aware Calendly booking experience with payment integration through Razorpay for India and Stripe for international users.

4 Website Structure

4.1 Primary Pages

1. Homepage
2. About Dr. Raga
3. Programs
   - Yoga
   - Diet Coaching
   - Gut Metabolism Reset
4. Women Abroad
5. Contact / Booking

4.2 Page Roles

Page	Primary Purpose
Homepage	Establish trust, communicate positioning, explain the problem, and drive Discovery Call bookings.
About Dr. Raga	Build scientific credibility and emotional connection.
Yoga	Present the 2,500/month morning batches and enable direct booking.
Diet Coaching	Explain the personalized diet coaching offering and pricing.
Gut Metabolism Reset	Present the premium gut-focused program and microbiome sequencing.
Women Abroad	Target Indian women living in the UK, USA, Germany, and Gulf countries.
Contact / Booking	Provide a frictionless booking experience through Calendly.

5 Homepage Structure

The homepage should function as the primary conversion page for the majority of visitors.

5.1 Navigation

The navigation should remain minimal and focused.

- Home
- About Dr. Raga
- Programs
  - Yoga
  - Diet Coaching
  - Gut Metabolism Reset
- Women Abroad
- **Book Discovery Call**

  The "Book Discovery Call" button should be visually highlighted.

5.2 Hero Section

"Your body has a root cause.
Dr. Raga finds it."

The supporting copy should immediately establish the scientific positioning and IIT Bombay association.

Primary CTA:

Book Discovery Call

5.3 The Problem

The section should empathize with women who have repeatedly tried generic approaches without understanding why their symptoms persist.

> **"You have tried. You are tired.**
> **Let us find why."**

The copy should focus on the frustration of repeatedly trying diets and lifestyle changes without identifying the underlying issue.

5.4 The Solution

Introduce Dr. Raga's four-pillar approach:

1. **Biochemistry**
2. **Microbiome**
3. **Nutrition**
4. **Yoga**

The purpose is to show that the approach combines scientific analysis with practical lifestyle interventions.

5.5 Our Programs

Present the three core offerings as simple, clearly differentiated cards.

Program	Starting Price	Positioning
Yoga	**2,500/month**	Morning yoga batches focused on women's wellbeing.
Diet Coaching	**30,000**	Personalized nutrition and lifestyle guidance.
Gut Metabolism Reset	**75,000+**	Premium root-cause program including microbiome sequencing.

5.6 Trust and Social Proof

Use testimonials and measurable outcomes wherever appropriate.

One example:

> **Padma's periods regulated in 20 days through diet alone.**
> No medication.

Additional trust messaging:

150+ women treated. Real results. Measurable science.

5.7 Floating WhatsApp CTA

A floating WhatsApp button should remain accessible throughout the website:

WhatsApp: +91 8008383699

The button should remain visible without obstructing the main content or CTA.

6 About Dr. Raga

The About page should establish both scientific credibility and personal connection.

6.1 Key Story Elements

The page should communicate:

- PhD from Heidelberg University
- IIT Bombay association
- 11 years spent in Germany
- Scientific background
- Personal experience navigating an autoimmune condition
- Experience supporting 150+ women

The narrative should balance scientific expertise with an approachable human story.

7 Yoga Program

The Yoga page should be straightforward and conversion-focused.

7.1 Core Offer

- Price: **2,500/month**
- Format: Morning batches
- Batch A
- Batch B

The page should clearly display current batch dates and availability.

7.2 Primary CTA

Join the Yoga Program

8 Gut Metabolism Reset

The Gut Metabolism Reset should be positioned as the premium offering.

8.1 Core Components

The page should clearly explain:

- The purpose of the program
- Gut and metabolic assessment
- Microbiome sequencing
- Personalized recommendations
- Expected program journey
- Pricing

8.2 Pricing

The starting price should be communicated consistently as:

75,000+

9 Women Abroad

The Women Abroad page should be introduced as the international expansion layer.

9.1 Target Markets

The initial focus should include Indian women living in:

- United Kingdom
- United States
- Germany
- Gulf countries

9.2 Key Requirement

The booking experience must support international visitors through timezone-aware scheduling and international payment options.

10 Contact / Booking Experience

The contact page should remove unnecessary friction.

10.1 Discovery Call

Let's Find Your Root Cause

Book your 45-minute 1:1 session with Dr. Raga.

10.2 Required Information

The booking flow should collect:

- Name
- WhatsApp Number
- Email
- Primary Health Concern

  The "Primary Health Concern" field can use a dropdown containing relevant categories such as:

- PCOS
- Thyroid
- Weight Management
- Gut Issues
- Hormonal Concerns

- Other

10.3 Payment

The final action should be:

Confirm & Pay 1,000

The booking system should support:

- Calendly
- Razorpay for Indian customers
- Stripe for international customers
- Timezone-aware scheduling
- No mandatory account creation

11 User Onboarding Journey

The ideal user journey should be simple and linear.

1. **Discovery**
   The user discovers Dr. Raga through an Instagram Reel, referral, or professional recommendation.
2. **Website Visit**
   The user lands on the mobile-optimized homepage.
3. **Problem Recognition**
   The visitor identifies with a relevant concern such as PCOS, thyroid issues, weight resistance, or gut problems.
4. **Trust Building**
   The user understands Dr. Raga's scientific background, methodology, and experience.
5. **CTA**
   The user clicks "Book Discovery Call."
6. **Booking**
   The user selects a suitable time through Calendly.
7. **Payment**
   The user pays 1,000 through the appropriate payment gateway.
8. **Confirmation**
   The user receives confirmation and the next steps.

12 Conversion Strategy

The website should follow one primary conversion principle:

One website. One primary action.
Book the Discovery Call.

Secondary actions such as WhatsApp should support the primary CTA rather than compete with it.

Every major page should provide a clear route toward booking.

13 User Confusion Points and Solutions

Problem	Recommended Solution
Outdated May/June batch dates	Immediately update all batch information to September/October 2026.
Broken contact page	Replace with a direct Calendly booking experience and integrated payment flow.
Inconsistent pricing	Audit every page and maintain consistent pricing across all offerings.
Confusing program structure	Clearly separate Yoga, Diet Coaching, and Gut Metabolism Reset.
T-Hub affiliation	Replace T-Hub references with the intended IIT Bombay positioning.
International booking friction	Implement timezone-aware scheduling and international payment support.

14 Marketing Strategy Integration

The website should operate as an important part of the broader marketing funnel.

14.1 Instagram Growth

The website should support the objective of growing the Instagram audience toward:

10,000 Instagram Followers

This milestone can support the transition toward the next layer of the business, including supplements and NexaGut.

14.2 Clinical Referrals

The website should provide enough scientific credibility for referrals from:

- Gynaecologists
- Healthcare professionals
- Women's health networks

14.3 Corporate Wellness

The website should also support inbound interest from:

- HR managers
- Corporate wellness teams
- Organizations looking for women's wellness programs

15 Mobile Considerations

Since a significant portion of traffic is expected to originate from Instagram and mobile devices, mobile optimization is essential.

15.1 Performance

- Target page load time: under 3 seconds
- Compress all images
- Minimize unnecessary animations
- Optimize video files
- Avoid excessive third-party scripts

15.2 Video Testimonials

All testimonial videos should be tested on:

- Android devices
- iPhones
- Major mobile browsers

15.3 Floating WhatsApp

The WhatsApp button should:

- Remain accessible
- Avoid covering important content
- Avoid covering CTA buttons
- Be clearly identifiable

16 Brand and Visual Direction

The visual identity should communicate science, trust, warmth, and women's wellbeing.

16.1 Recommended Color Palette

Color	Recommended Use
Deep Plum	Primary brand color, headings, CTA elements
Cream	Backgrounds and soft sections
White	Primary content backgrounds
Dark Gray	Body text

The ForHerWellbeing logo should not be placed over visually busy backgrounds.

17 Content Guidelines

17.1 Preferred Messaging

The copy should remain direct, clear, credible, and human.

Use:
"150+ women treated. Real results. Measurable science."

"Padma's periods regulated in 20 days through diet alone. No medication."

17.2 Messaging to Avoid

Avoid exaggerated or overly promotional language.

Avoid:
"Transform your life with our AMAZING program!!!!"

"Optimise your circadian rhythm through biohacking protocols."

The overall writing style should be:

- Simple
- Professional
- Specific
- Evidence-oriented
- Easy to understand

18 Product and App Strategy

The website should not introduce an application section that promises functionality that is not yet available.

Instead, the website should use a simple email waitlist.

18.1 Recommended Approach

- Introduce the upcoming product briefly.
- Explain the value in one or two sentences.
- Provide an email signup.
- Manage the waitlist through Mailchimp.

This keeps expectations clear while allowing the business to build an audience for future product launches.

19 Final Do's and Don'ts

19.1 Do

- Ensure every major page clearly communicates the IIT Bombay association.
- Keep the Discovery Call CTA visible throughout the website.
- Use a timezone-aware Calendly booking system.
- Integrate payment directly into the booking flow.
- Keep pricing consistent.

- Keep program dates updated.
- Optimize the website for mobile.
- Use deep plum, cream, and white as the primary visual palette.
- Use clear scientific and outcome-oriented messaging.

19.2 Don't

- Do not use outdated batch dates.
- Do not show conflicting prices.
- Do not create unnecessary steps before booking.
- Do not overcomplicate the onboarding process.
- Do not promise an application experience that is not yet available.
- Do not use exaggerated marketing language.
- Do not place the logo over busy backgrounds.
- Do not allow WhatsApp or secondary CTAs to distract from the Discovery Call.

20 Recommended End-to-End User Flow

Instagram / Referral → Homepage → Problem Recognition → Trust → Program / Method → Book Discovery Call → Calendly → 1,000 Payment → Confirmation

The website should make the decision easy:

"I understand the problem.
I trust the person.
I know what to do next."

21 Final Recommendation

The redesigned ForHerWellbeing website should prioritize clarity over complexity.

The visitor should quickly understand:

1. What ForHerWellbeing does.
2. Who it helps.
3. Why Dr. Raga is qualified to help.
4. What programs are available.
5. How much they cost.
6. What the next step is.

The entire website should ultimately guide qualified visitors toward one simple action:

Book Discovery Call

Science-backed wellness. Clear guidance. A focused next step.
